

 **Delta REC**

Delta REC 40

Compartmentalized draining trailer

The objective of the Delta REC trailer is to:

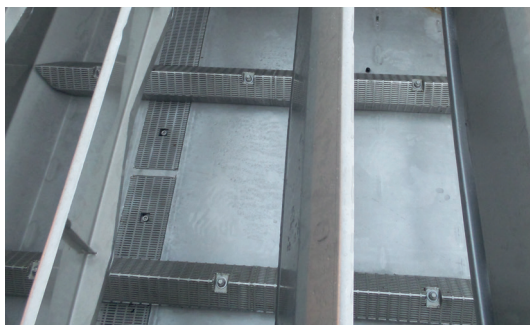

- Control grapes compression and crushing.
- Quickly separate free-run juices right from the vineyard.
- Preserve the juices during transportation by integrating a sulphiting process right from the vineyard.

Tilting flaps with hydraulic control

Two side tanks equipped with two access doors

Stainless steel drains

Fundamental assets

- Combination of grapes supplies (machine-harvested or hand-picked grapes).
- Possibility to get 100% of free-run juices as well as those released during transportation, which can represent up to 50% of recoverable juices.
- Grapes compression and crushing are limited.
- Juices maceration and oxidation are eliminated during transportation.
- Immediate juice sulphiting.
- User's safety.

Description

- Tilting flaps with hydraulic control.
- Stainless steel drains.
- Two side tanks designed to control oxidation equipped with two access doors.
- Reception hopper in 304L stainless steel - thickness 3mm.
- Removable draining grid 600 x 600 mm in 304L stainless steel with trapezoidal bars - spacing 6 mm.
- Road chassis in painted steel.
- Low-pressure wheels 2.5 bars.
- Rear-view camera.

Options

- Integrated sulphiting process with dosing pump.
- Vibrating plate in 304L stainless steel, thickness 4 mm – width 700mm – water-tightness between the vibrating plate and the juice reception hopper – Two vibrating flyweight engines with a power of 0.62 Kw / engine – Four anti-vibration silent blocs – Grid with oblong holes 2 x 20 mm.
- Tarpaulin.
- Hydraulic housing.
- On-board, offline hydraulic power unit.
- Plate narrower 500 mm.
- Rear suspensions.
- Mudguard.
- Electric remote control.
- Suspended draw bar.

Dimensions

Overall dimensions: L 5000 mm x w 2000 mm x h 1850 mm

Hopper dimensions: L 3450 mm x w 1750 mm

Empty weight: 1500 kg
