

Vibrating Trailer Delta RV/RVE

Delta RV with options

Gentle handling from vineyard to winery

The Delta vibrating trailer RV or RVE is designed for the:

- Reception and transfer of hand picked or mechanically harvested grapes.
- Even distribution of grapes without grinding up or bridging.
- Efficient draining of free juices.

Delta RV with wheels inflated with low pressure, mud guard and step

Vibrating plate with draining grid

Self-contained and taken on board hydraulic

Key benefits

- Versatile (Hand picked or mechanically harvested).
- No moving mechanical parts (no screws or belt...).
- No grinding of grapes.
- Flow controlled by VSD.
- User safety.
- Hygiene facilitated by simplified cleaning.
- Less maintenance and mechanical upkeep.

Technical Specifications

- Reception hopper in 3 mm thick – 304L Stainless steel.
- Vibrating plate in 304L stainless steel, thickness 4 mm, width 700 mm.
- Watertight between the vibrating plate and the reception hopper.
- Stainless steel draining grid 600 x 600 mm of 304L with trapezoid bars 6 mm.
- Juice reception container with inspection door and ball valve.
- Road worthy trailer chassis in painted steel.
- 2 vibrating motors (0,62 Kw per motor) controlled by VSD.
- 4 rubber absorbers for noise reduction.

Options

- Grid with oblong holes 2 x 20 mm.
- Protective flexible cover.
- Hydraulic protection.
- Adjustable step in galvanised steel.
- Self-contained and taken on board hydraulic group.
- Juice hopper – with 2 grids which can be dismantled.
- Narrower 500 mm.
- Rear suspensions.
- Wheels inflated with low pressure 2.5 bars
- Mud guard.
- Remote electric control.
- Back-up Kamera.
- Suspended beam.
