

YellowJacket™ Depalletizer

Automated

Cans

Safely Stores
Slip-Sheets

Reduce Manual Labor

Military Grade Anodized
Aluminum

Hands-Off Canning - Starts Here!

The YellowJacket™ can hold an entire pallet of cans and automatically feed them to a wide variety of A.B.E. canning options. The transfer conveyor delivers the empty cans to the dual, or single lane twist rinse where they are inverted, and rinsed, to ensure debris or dust particles are removed. Once rinsed, cans are reverted and delivered to the feed end of the main filler conveyor.

YellowJacket™ Depalletizer

KEEPING YOUR BREWERY SAFE

Safety is a priority in any brewery. To help reduce chances of slips or falls, the YellowJacket™ automatically removes slip-sheets and stores them in a protective compartment creating a clutter-free environment!

FULL SERVICE OPERATION

A.B.E. not only offers world-class manufacturing and design expertise, but A.B.E. also stands firmly behind every product sold; whatever it takes to make sure you're satisfied with your equipment, and that it operates at or above your expectations.

SMOOTH AS SILK

The YellowJacket™ delivers a consistent can feed to your canning line by gently moving your cans from the tower onto the conveyor and through the twist rinser. Better yet, no air is required, which means a quieter, more stable depalletizer operation.

DURABILITY

When it comes to durability, the YellowJacket™ has you covered. Constructed of MIL-8625 military grade anodized aluminum and 304 stainless steel, the YellowJacket™ is strong, lightweight and rigid. When it comes to depalletizing, you can count on the YellowJacket™!

YellowJacket™

System Dimensions:

- Length: 110 in (279.4 cm)
- Width: 98 in (248.9 cm)
- Height: 139 in (353 cm)

Electrical Requirements:

- Electrical: 208-240 volt, 1- phase, 60 Hz, 20 Amp
- Other electrical options available

Water Requirements:

- Twist rinse 2 gallon per minute at 35 PSI

Features:

- No air required!
- Integrated slip-sheet storage
- Fully enclosed can loading area
- Intelligent Interconnect™. American Beer Equipment ecosystem of products communicate and adapt throughout the workday to better serve the customer
- Sturdy construction of 304 stainless steel and anodized military grade aluminum
